## Education

### Boston University

*Ph.D of System Engineering, GPA: 4.0/4.0,*

**Boston, MA, USA**

*Expected Graduation: August 2022*

**Advisor:** Prof. Alex Olshevsky,

**Research Interests and Related Courses:** Learning from Data; Reinforcement Learning; Optimization.

### University of Chinese Academy of Sciences,

*Master of Science, Operations Research and Cybernetics, GPA: 92.37/100,*

**Beijing, China**

*June 2017*

**Advisor:** Prof. Han-Fu Chen,

**Related Courses:** Advanced Probability; Stochastic Processes; Multi-Agent Systems; Linear Systems.

### Nankai University

*Bachelor of Science, Mathematics and Statistics, GPA: 92.49/100,*

**Tianjin, China**

*June 2014*

**Related Courses:** Mathematical Statistics; Graph Theory.

## Skills

Experienced in **Machine Learning, Optimization and Statistics** algorithms and techniques.

**Programming:** Python, C++, and R.

**Software:** MATLAB/Simulink, TensorFlow and PyTorch.

## Experience & Projects

### Reinforcement Learning and Machine Learning.....

#### ○ Distributed Temporal Difference (TD) Learning with Almost No Communication. [PDF]

- Proposed a new distributed TD algorithm (relies on "one-shot averaging"), which significantly saves on communication and performs essentially identically to the other methods. Moreover, this is the first result rigorously showing benefits from parallelism for TD methods.
- Implemented simulations on classic control problems in the OpenAI Gym and a grid world Markov Decision Process (MDP) problem.

#### ○ Temporal Difference Learning as Gradient Splitting., International Conference on Machine Learning (ICML), PMLR, 2021. **Accepted for long presentations(Top 3%).** [PDF]

- Provided an interpretation of TD in terms of a splitting of the gradient of an appropriately chosen quadratic function.
- Proved improved non-asymptotic convergence times, as well as a better scaling with the discount factor.

#### ○ Anomaly Detection for Flagging Fake Product Reviews. [PDF]

- Applied and compared a number of supervised and unsupervised methods to the problem of review spam detection.
- Implemented experiments on YelpCHI datasets (contains hotel reviews and restaurant reviews).

## Optimization and Matrix Completion.....

- **Asymptotic Convergence Rate of Alternating Minimization for Rank One Matrix Completion.** IEEE Control Systems Letters, 2020. [PDF]
  - Studied alternating minimization algorithm for matrix completion, and bounded the asymptotic convergence rate without any assumptions on degrees or diameter.
  - Performed simulations for various kinds of graphs (line, star, 2d-grid and 3d-grid and complete graph).

## Stochastic Approximation.....

- **Distributed and Recursive Blind Channel Identification to Sensor Networks.** Control Theory and Technology, 2017. [PDF]
  - Proposed a distributed and recursive blind channel identification algorithms (based on the truncated stochastic approximation) for both time-invariant and time-varying networks.
  - Proved its convergence and showed computation results consistent with theoretical analysis.

## Work Experience

---

- **Teaching Fellow:** Probability, Statistics, and Data Science (ENG EK381, Boston University), Fall 2019 and Fall 2020.

## Publications

## Awards

---

- Boston University SE/CISE Grace Hopper Scholarship, 2020
- Dean's Fellowship Award, Sep. 2017-Aug. 2018
- Samsung Scholarship, Sep. 2012-Aug. 2013
- Meritorious Winner of The Mathematical Contest in Modeling, 2013
- First Prize of Excellent Undergraduate Scholarship, Sep. 2011-Aug. 2012
